Explanation:

If at least one member must be a woman, the committee will have either one woman and two men or two women and one man. Use combinations because the order does not matter.

Choosing one woman and two men: $2C1 \times 4C2 = 6$

Choosing two women and one man: $2C2 \times 4C1 = 4$

Since both situations would satisfy the requirement that at least one member is a woman, add the combinations.
