But the matter is that passing the CAS-004 dumps actual test is not a simple thing, But now I have to tell you that all of these can be achieved in our CAS-004 exam preparation materials.

You may previously think preparing for the CAS-004 practice exam will be full of agony;

### **NEW QUESTION: 1**

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario.

Your network contains an Active directory forest named adatum.com.

All client computers run Windows 10 Enterprise. All the computers are named by using the name of their respective department and an incremental three-digit number. For example, the first computer in the sales department is named Sales001.

Several managers use tablets that run Windows 10 and have 3 GB of RAM. All other client computers have at least 8 GB RAM.

Adatum.com is synchronized to Microsoft Azure Active Directory.

Your company implements the Microsoft Store for Business.

You have a deployment of System Center Configuration Manager (Current Branch) that has discovery configured. All the client computers have the Configuration Manager client installed.

The company uses the applications shown in the following table.

The company identifies the following requirements for software deployments:

- \* View the Upgrade Readiness data of all the client computers.
- \* Deploy App1 to the client computers in the marketing department.
- \* Deploy App2 to the client computers in the human resources (HR) department.
- \* Monitor the usage of App3.
- \* Deploy SalesAppLite to sales department computers that have 3 GB of RAM or less.
- \* Deploy SalesAppFull to sales department computers that have more than 3 GB of RAM.

You create a cloud-based distribution point that has a public name of d1594d4527614a09b934d470.

End of repeated scenario.

You need to ensure that you can deploy App1 to the marketing department computers.

What should you do?

**A.** Download the App-V client and install the client by using a Group Policy object (GPO).

- B. Sequence App1 by using the App-V Sequencer.
- C. Deploy a Group Policy object (GPO) that enables the App-V client.
- D. Download the App-V client and deploy the client by using a Configuration Manager application.

**Answer: D**

## **NEW QUESTION: 2**

Scenario

Please read this scenario prior to answering the question

You have been assigned the role of Lead Enterprise Architect for a firm that produces components and replacement parts for the automobile, electronics, and telecommunications industries. The firm has been established for over 70 years. North America has been the primary market for its products, with just 20% of its output being exported to Europe. The firm is planning to expand its exports to Europe and also to establish sales in South America and the Asia Pacific region.

The firm is organized into business units that each focus on the different industry sectors. Each business unit has acquired other producers to expand its manufacturing capacity. This has resulted in a complex environment with a high diversity of business and manufacturing systems.

The Enterprise Architecture (EA) program within the firm has been functioning for several years. It has made significant progress in consolidating the technology portfolio and establishing key standards. The CIO and the COO are joint sponsors of the EA program. The EA program is mature, with an active Architecture Board and a well-defined architecture process and standard content templates based on the TOGAF 9 Architecture Content Framework. The EA process framework is well coordinated with the PMO, Systems Development, and Operations functions.

The firm has completed a strategic plan to reorganize its Sales & Marketing organization according to the target geographic markets. One of the goals of this reorganization is to improve the ability of Marketing to collect more meaningful market analytics that will enable each sector to better address market needs with effective marketing campaigns and global product presence.

A Request for Architecture Work to address the goals of the reorganization has been approved. As the architecture team commences its work, the CIO has expressed concerns about whether the firm will be able to adapt to the proposed change and how to manage the associated risks. Refer to the Scenario

You have been asked how to address the concerns of the CIO.

Based on TOGAF, which of the following is the best answer?

**A.** In Phase A, the team should analyze their risk by completing an Implementation Factor Assessment and Deduction Matrix to identify the particular risks associated with the implementation and deployment.

The matrix should include a list of factors to be considered, their descriptions, and constraints that should be taken into account. These factors can then used to assess the initial risks associated with the proposed project.

**B.** In Phase A, the team should use the Business Transformation Readiness Assessment technique to identify the factors that will influence the reorganization. The assessment should include determining the readiness rating for each factor based on a maturity scale that will

allow the team to gauge the urgency, readiness, and degree of difficulty to fix. These factors can then be used to assess the initial risks associated with the proposed project.

**C.** In Phase A, the team should conduct a Business Scenario to identify the stakeholders' concerns and the resulting requirements. Once the requirements have been identified, they can be assessed in terms of their risks. The risks should be evaluated in terms of how they could be avoided, transferred, or mitigated. Any risks that cannot be resolved should be identified as residual risks and their disposition should be decided by the Architecture Board.

**D.** In Phase B, the team should create a set of views that will enable them to identify the factors that will influence the reorganization. There should then be an assessment of each factor on a maturity scale that will allow the team to gauge the urgency, readiness, and degree of difficulty to fix. These factors can then be used to assess the initial risks associated with the proposed project.

**Answer: B**

### **NEW QUESTION: 3**

A System Administrator has an XGS 4100 appliance that has a single 8-port RJ-45 copper Network Interface Module (NIM) installed.

What is the maximum number of in-line network segments, of any media type, that could be protected?

**A.** 0

**B.** 1

**C.** 2

**D.** 3

**Answer: B**

### **NEW QUESTION: 4**

미국 본부와 프랑스 지사를 둔 국제 의료기구가 양국에서 약을 시험하고 싶어합니다. 테스트 대상자의 데이터로 수행할 수 있는 조치는 무엇입니까?

**A.** 미국에서 처리하지만 프랑스에 정보 저장

**B.** 미국에서 익명으로 처리하십시오.

**C.** 타사와 공유하십시오.

**D.** 미국의 한 데이터베이스에 집계합니다.

**Answer: C**

Explanation:

설명

섹션 : 보안 평가 및 테스트
