1V0-71.21PSE Questions Based on Real Exams Scenarios, All our regular candidates have impulse to choose again when they have the similar 1V0-71.21PSE exam.

NEW QUESTION: 1

Two-factor authentication can be circumvented through which of the following attacks?

- A. Brute force
- B. Denial-of-service
- C. Man-in-the-middle
- D. Key logging

Answer: C

Explanation:

A man-in-the-middle attack is similar to piggybacking, in that the attacker pretends to be the legitimate destination, and then merely retransmits whatever is sent by the authorized user along with additional transactions after authentication has been accepted. A denial-of-service attack does not have a relationship to authentication. Key logging and brute force could circumvent a normal authentication but not a two-factor authentication.

NEW QUESTION: 2

How does assignment routing improve efficiency ?

- A. By assigning work to the most senior party in a work group
- B. By assigning work to the currently available party
- C. By assigning work to the party in the appropriate time zone
- D. By assigning work to the most appropriate parties

Answer: D
