#### **NEW QUESTION: 1**

Which statement describes the behavior of a security policy?

- A. Traffic destined to the device itself always requires a security policy.
- B. Traffic destined to the device's incoming interface does not require a security policy.
- C. The implicit default security policy permits all traffic.
- D. The factory-default configuration permits all traffic from all interfaces.

**Answer: B**

#### **NEW QUESTION: 2**

Which statements are true about the HP Helion portfolio of products and services? (Select two)

- A. It is always a bundled hardware and software solution.
- B. It is based on a common open architecture.
- C. It provides hybrid delivery.
- D. It is based on CloudStack.
- E. It utilizes homogeneous resource pools.

**Answer: A,C**

#### **NEW QUESTION: 3**

You manage a server that runs Windows Server 2008. The windows backup and restore utility is installed on the server. You need to create a full backup of all system state data to the DVD drive (R: drive) on the server. Which command should you run on the server?

- A. Wbadmin start backup CallCritical Cbackuptarget:C: /quiet
- B. Wbadmin enable backup Caddtarget:C: /quiet

**C.** Wbadmin start backup CallCritical CbackupTarget:R:/ quiet

**D.** WBadmin enable backup -addtarget:R: /quiet

**Answer: C**

Explanation:

Explanation/Reference: Wbadmin start backup

Creates a backup using specified parameters. If no parameters are specified and you have created a scheduled daily backup, this subcommand creates the backup by using the settings for the scheduled backup. If parameters are specified, it creates a Volume Shadow Copy Service (VSS) copy backup and will not update the history of the files that are being backed up.

-quiet

Runs the subcommand with no prompts to the user.

-backupTarget

Specifies the storage location for this backup.

-allCritical

Specifies that all critical volumes (volumes that contain operating system's state) be included in the backups. This parameter is useful if you are creating a backup for bare metal recovery. It should be used only when -backupTarget is specified, otherwise the command will fail. Can be used with the -include option.
