- E. Option H
- F. Option E
- G. Option A
- H. Option F

Answer: C,D,F,G

Explanation:

Explanation

An architecture framework for media services supports different models of video models. As shown in Figure

14-13, the network provides service to video media in the Media Services Framework. Those services are access services, transport services, bridging services, storage servers, and session control services, which are provided to endpoints.

Access services provide identity of end devices, mobility, and location services.

Transport services provide QoS for reliable packet delivery.

Bridging services provide transcoding, conferencing, and recording services of media streams.

Storage services provide capture and storage of media streams and content management and distribution.

Session control services provide session signaling and control and gateway services.
