Virtual accounts are "managed local accounts" that provide the following features to simplify service administration:

- No password management is required.
 - The ability to access the network with a computer identity in a domain environment.
- Virtual accounts require very little management. They cannot be created or deleted, nor do they require any password management.

You must be a member of the Administrators group on the local computer to perform the following procedures. To configure a service to use a virtual account:

- Click Start, point to Administrative Tools, and then click Services.
- In the details pane, right-click the service that you want to configure, and then click Properties.
- Click the Log On tab, click This account, and then type NT SERVICEServiceName.

When you are finished, click OK.

- Restart the service for the change to take effect.
